

OMNIKLEEN JT

Product description :

A mildly alkaline cleaner for industrial purposes, among other things suited for food processing and related industries. Also excellent for tankcleaning by using as additive and cleaning ship decks. It easily removes animal and vegetable oils and fats, proteins and other suchlike contaminations, but also mineral oils and greases. Very effective if applied in low and high pressure equipment, steam cleaners, circulation systems, but also suitable for manual application. The biodegradability of the surface active agents used in this product satisfies the Detergents Regulation (EC 648 / 2004).

Instructions for use :

When using the product the first time, it is recommended to do some tests on a less visible spot. Dilution ratios depend on type and amount of contamination, equipment used, as well as water temperature and pressure. The product may be diluted up to max. 1 : 25 with water. Tankcleaning 0,5-2,5%. Apply to the object to be cleaned, allow to work for some time (do not let dry!), then flush with plenty of water.

Technical data :

Colour	cream
Form	liquid
Minimum processing temperature	+5°C
Maximum processing temperature	+95°C
Flashpoint PMCC in °C	not applicable
Concentration analysis	not applicable
Specific storage requirements
